

**1. With the electric stairlift you can transport the Movielift in an uncomplicated manner, both up and down stairs.**

**2. The high arms are well thought-out. They extend above the seats and in this way give the Movielift stability and security. They can be adjusted for height and can cope with every on-the-spot situation.**

**3. The basket for person and materials is now simply suspended by brackets. This basket sits firmly and safely in position.**

**4. The 230V drive for the Movielift is mounted on a separate elevating truck, this can power the Movielift up to 10 metres away from the platform.**

**5. In just 10 minutes, two people can assemble the Movielift and start work immediately. Our experts will give you a hands on training session before using the system for the first time.**

<b>Working height</b>	<b>10.00m</b>
